

CARGO NET

Welcome to TREKFIT's Cargo Net, a military-style climbing net with a twist. With a sleek, modern look, it stands an impressive 14 feet high. For the younger crowd there is a 10 ft. model, which is ideal as part of a circuit or to fit a smaller space.

The Cargo Net's mesh is made from galvanized steel cable, covered with polyester for maximum resistance to abrasion and discoloration, while its openings are larger than a foot to avoid entanglement.

The best part? The entire structure is twisted so that it can deliver both positive and negative incline possibilities, allowing the user to tailor the workout to their own fitness level. Inspired by boot-camp military climbing nets, our model combines the beauty of sculpture with the most thrilling workout imaginable.
